KAP	074	V01.01

1. Introduction and Objectives of the CM2-10 Awareness and Overview for Leadership

For leaders, tracking requirements, changes, and configurations throughout the product lifecycle is of great importance. Failure to effectively manage data in these areas can lead to costly corrective actions, difficulties in tracking configurations used in the field, and expensive recalls.

This training covers topics such as achieving organizational success with the CM2 model, resolving organizational complexity, leveraging digital twins and digital threads, using requirements as data sets, managing the change process, and effectively utilizing software tools necessary for the product lifecycle.

2. Course Outline

- Managing the Business
- Hierarchical Structure of the Digital Thread
- Corporate Framework
- Managing Requirements with Data Sets
- Resolving Organizational Complexities
- Digital Twin and Digital Thread
- Developing World-Class Products
- Components of the CM2 Change Process
- Effective Use of Software Tools
- Decision-Making Processes in Change Management
- Points of Change Implementation, Release, and Effective Dates

3. Course Duration

- 3 hours

4. Who Should Attend

- General Managers
- Deputy General Managers
- R&D Managers
- Configuration Managers
- Project Managers
- Systems Engineering Managers
- Product Development Managers
- Process Managers
